

ASSET CLASS PERFORMANCE UPDATE

As of December 31, 2017

HOW TO USE MARKETS AT-A-GLANCE

Markets At-A-Glance shows annual and year-to-date (YTD) performance for a broad array of financial market asset classes. As the overall market moves through different cycles and environments, individual asset class performance can also fluctuate. This report is helpful in illustrating the extent to which asset class performance can vary and the importance a well-diversified portfolio can have in potentially minimizing these variations.

Page 2 Asset class performance snapshot

Page 3

EQUITY

- The S&P 500 Index gained 6.6% during the fourth quarter, bringing the 2017 return to 21.8%. Solid U.S. economic and earnings growth, improving overseas economies, and optimism that the new tax law would stimulate economic growth and corporate profits all helped drive gains.
- Growth beat value for the fourth straight quarter on strength in the technology and consumer discretionary sectors.
- Small caps trailed large caps in the quarter despite more potential benefit from lower corporate tax rates; large caps benefited from U.S. dollar weakness, improving overseas growth, and the ability to repatriate overseas cash at low tax rates.
- Emerging markets (EM) outperformed U.S. and developed international equities during the quarter based on the MSCI benchmarks, benefiting from U.S. dollar weakness, improving economic growth overseas, and commodities gains.

Page 4

FIXED INCOME

- The Bloomberg Barclays Aggregate Bond Index returned 0.39% in the fourth quarter and 3.54% for the full year.
- Both short- and long-term yields rose during the quarter, though rising Federal Reserve rate hike expectations meant short-term yields rose faster, leading to a flatter yield curve.
- Investment-grade corporate bonds saw strength during the quarter, as did Treasury Inflation-Protected Securities (TIPS), which benefited from rising inflation expectations.
- Credit-sensitive areas of the bond market outperformed the Bloomberg Barclays Aggregate Bond Index again, with bank loans outperforming high-yield bonds. High-yield bonds saw weakness in November, most of which stemmed from sector (telecommunications) and company specific issues, but recovered in December.

Page 5

ALTERNATIVES

- The HFRX Systematic Diversified CTA Index led all quarterly alternative investment returns with a gain of 7.1%. Long equity exposure continued to drive portfolio gains as the upward trend in global markets persisted.
- The HFRX Market Neutral Index was the main laggard, as the category declined 1.0%. Many strategies within the category have a long bias to value stocks, while being short growth firms, an approach that was a broad headwind to overall returns this year.

There is no guarantee that a diversified portfolio will enhance overall returns or outperform a nondiversified portfolio. Diversification does not ensure against market risk.

Investing involves risk including the risk of loss. Asset class returns are represented by the returns of indexes and are not ranked on an annual total return basis. Indexes are unmanaged and cannot be invested into directly. Unmanaged index returns do not reflect fees, expenses, or sales charges. Index performance is not indicative of the performance of any investment. Past performance is no guarantee of future results. Because of their narrow focus, specialty sector investing will be subject to greater volatility than investing more broadly across many sectors and asset classes.

Investing involves risk including the risk of loss. Asset class returns are represented by the returns of indexes and are not ranked on an annual total return basis. Indexes are unmanaged and cannot be invested into directly. Unmanaged index returns do not reflect fees, expenses, or sales charges. Index performance is not indicative of the performance of any investment. Past performance is no guarantee of future results. Because of their narrow focus, specialty sector investing will be subject to greater volatility than investing more broadly across many sectors and asset classes.

Indexes:

60/40 Portfolio—60% Russell 3000/40% Bloomberg Barclays Aggregate; Absolute Return—HFRX Absolute Return; Equity Long/Short—HFRX Equity Hedge; Event Driven—HFRX Event Driven; Managed Futures—Credit Suisse Managed Futures; Global Macro—HFRX Macro; Market Neutral—HFRX Equity Hedge: Equity Market Neutral; Physical Commodities—S&P GSCI

IMPORTANT DISCLOSURES

The economic forecasts set forth in the presentation may not develop as predicted. The opinions voiced in this material are for general information only and are not intended to provide or be construed as providing specific investment advice or recommendations for any individual security. All performance referenced is historical and is no guarantee of future results.

Investing involves risks including possible loss of principal. No investment strategy or risk management technique can guarantee return or eliminate risk in all market environments.

All market indexes discussed are unmanaged and are not illustrative of any particular investment. Indices do not incur management fees, costs and expenses, and cannot be invested into directly.

All information is believed to be from reliable sources; however, LPL Financial makes no representation as to its completeness or accuracy.

This research material has been prepared by LPL Financial LLC.

To the extent you are receiving investment advice from a separately registered independent investment advisor, please note that LPL Financial LLC is not an affiliate of and makes no representation with respect to such entity.
